2/22/70 - new opening but only slight change
Again, a current issue in his own
meaningless words, "De Pollution Revolution"
Again he is trying to take a current issue &
make it look like his & he is for progress Clothes
fmed down. Actor Bill Bentley is his first
"expert" Expert? Then a Dr. Grossman
Three segments tapped out of studio, in diff-
ferent places, while he has wearing different clothes
Rehash of same program. Then Lionel Barr, a TV
man - another "expert" But he has one statement -
put a "Stop on a gyro home saying 'I am
a pollutor'." With a wit & typical a post-
post he is more boring & more unimaginative
than his usual boring & unimaginative self
Or he then crowds left with "Western
Regional Manager of General Motors"
Thomas Pond? He had slides making it top
better than reality.
